5 / 5 submitted

Q1. Program based on Classes and Objects - Initializaing Data member using Objects directly

Score: 0.00 **TC: 0/3 passed**

CODE

```
import java.util.Scanner;
class Student{
    int rollNo;
    String name;
    double marks;
    void displayDetails(){
        System.out.println("RollNo:"+rollNo);
        System.out.println("Name:"+name);
        System.out.println("Marks:"+marks);
    }

    public static void main(String[]args){
        Scanner sc= new Scanner(System.in);
        Student s=new Student();
        s.rollNo=sc.nextInt();
        sc.nextLine();
        s.name=sc.nextLine();
        s.marks=sc.nextDouble();
         s.displayDetails();
          sc.close();

    }
}
```

INPUT

```
25
kalyan
99
```

OUTPUT

```
RollNo:25
Name:kalyan
Marks:99.0
```

97

166

Q2. Classes and Objects-Initialize Object Data Using Setter Methods

CODE

```
import java.util.Scanner;
class Student{
    private int rollNo;
    private String name;
    private double marks;
    public void setRollNo(int rollNo){
        this.rollNo=rollNo;
    }
    public void setName(String name){
        this.name=name;
    }
    public void setMarks(double marks){
        this.marks=marks;
    }
    public void displayDetails(){
        System.out.println("RollNo: "+rollNo);
        System.out.println("Name: "+name);
        System.out.println("Marks: "+marks);
    }
}
public class Main{
    public static void main(String[] args){
        Scanner sc=new Scanner(System.in);
        Student s=new Student();
       int rollNo=sc.nextInt();
       sc.nextLine();
       String name=sc.nextLine();
       double marks = sc.nextDouble();
        s.setRollNo(rollNo);
        s.setName(name);
        s.setMarks(marks);
        s.displayDetails();
        sc.close();

    }
}
```

OUTPUT

```
(no output)
```

Q3. Student Details Using Default and Parameterized Constructors

Score: 0.00 TC: 0/3 passed

CODE

```
import java.util.Scanner;
class Student {
    int rollno;
    String name;
    double marks;

    public Student(){
        this.rollno =  101;
        this.name = "Rahul";
        this.marks = 85.5;
    }
    public Student(int rollno,String name,double marks){
        this.rollno = rollno;
        this.name = name;
        this.marks = marks;
    }
    public void displayDetails(){
        System.out.println("Roll No: "+ rollno);
        System.out.println("Name: " + name);
        System.out.println("Marks: "+ marks);
    }
}
class Main{
    public static void main(String[] args){
        Student student1 = new Student();
        student1.displayDetails();
        Scanner scanner = new Scanner(System.in);
        int rollno = scanner.nextInt();
        scanner.nextLine();
        String name = scanner.nextLine();
        double marks = scanner.nextDouble();
        Student student2 = new Student(rollno,name,marks);
        student2.displayDetails();
        scanner.close();
    }
}
```

INPUT

```
101
Rahul
85.5
```

OUTPUT

```
Error: Main method not found in class Student, please define the main method as:
   public static void main(String[] args)
or a JavaFX application class must extend javafx.application.Application
```

Q4. Net Salary Calculation Using Single Inheritance

Score: 0.00 TC: 0/3 passed

CODE

```
import java.util.*;

class Employee {
    int empId;
    String empName;
    double basicSalary;

    void getEmployeeDetails(int empId, String empName, double basicSalary) {
        this.empId = empId;
        this.empName = empName;
        this.basicSalary = basicSalary;
    }
}

class Salary extends Employee {
    double hra, da, netSalary;

    void calculateSalary() {
        hra = basicSalary * 0.20;
        da = basicSalary * 0.10;
        netSalary = basicSalary + hra + da;
    }

    void displayDetails() {
        System.out.println("Employee ID: " + empId);
        System.out.println("Employee Name: " + empName);
        System.out.println("Basic Salary: " + basicSalary);
        System.out.println("HRA: " + hra);
        System.out.println("DA: " + da);
        System.out.println("Net Salary: " + netSalary);
    }
}

public class Employee {
    public static void main(String[] args) {
        Scanner sc = new Scanner(System.in);

        int empId = Integer.parseInt(sc.nextLine());
        String empName = sc.nextLine();
        double basicSalary = Double.parseDouble(sc.nextLine());

        Salary s = new Salary();
        s.getEmployeeDetails(empId, empName, basicSalary);
        s.calculateSalary();
        s.displayDetails();

        sc.close();
    }
}
```

INPUT
