Level 3 — Hard (H) Balance — Control

✓ Submitted

Develop a JAVA code to display the balance. Include the following members:

- Design a class to represent a bank account.
- Data Members: Name of the depositor, Account number, Type of account(Savings/Current), Balance amount in the account(Minimum balance is Rs.500.00)
- Methods:

1. To read account number, Depositor name, Type of account.

2. To deposit an amount (Deposited amount should be added with it)

3. To withdraw an amount after checking balance(Minimum balance must be Rs.500.00)

Note : Assume that balance amount = 10000

Testcase: 1. 100, Raja, S, 8000

2. Raja, 100, S, 9000

3. 101, Rani, S, 12000

4. 102, Ragu, W, 8000

5. 103, Ravi, C, 10000

Your Code

```
1 import java.util.*;
2 class BankAccount{
3     String depositorName;
4     int AccountNumber;
5     String AccountType;
6     double balance;
7
8 void readaccountdetails() {
```

```
9      Scanner sc=new Scanner(System.in);
10     depositorName=sc.nextLine();
11     AccountNumber=sc.nextInt();
12     sc.nextLine();
13     AccountType=sc.nextLine();
14
15     balance=sc.nextDouble();
16
17 }
18 void deposit(){
19     Scanner sc=new Scanner(System.in);
20     double Amount=sc.nextDouble();
21     balance=balance+Amount;
22     System.out.println("Amount deposited: "+Amount);
23     System.out.println("balance after deposit: "+balance);
24
25 }
26
27 void withdraw(){
28     Scanner sc=new Scanner(System.in);
29     double Amount=sc.nextInt();
30     if(Amount<=balance){
31         balance=balance-Amount;
32         System.out.println("Amount withdrawn: "+Amount);
33     }
34     else{
35         System.out.println("Insufficient balance");
36     }
37     System.out.println("Balance amount: "+balance);
38 }
39 void display(){
40     System.out.println("\n---bank account details---");
41     System.out.println("depositorName: "+depositorName);
42     System.out.println("Account number: "+AccountNumber);
43     System.out.println("Account type: "+AccountType);
44     System.out.println("balance: "+balance);
45
46 }
47 }
48 public class main{
49     public static void main(String[] args){
50         Scanner sc=new Scanner(System.in);
51         BankAccount account=new BankAccount();
```

```
52         account.readaccountdetails();
53         account.display();
54         account.deposit();
55         account.withdraw();
56         System.out.println("\nFinal balance:");
57         sc.close();
58     }
59 }
60
61
62
63
64
```

Output

Compilation Error:

C:\Windows\TEMP\sandbox_192472274RA_6a9
504206100f2.00295732\BankAccount.java:4
8: error: class main is public, should
be declared in a file named main.java
